

Website Services

Pricing per type of service.

Economy	Standard	Premium
Edit and improve the text and headings — correct and enhance images — on an existing website. <i>\$500 to \$1,500</i>	Write, develop and implement a simple 8 to 10 page website based on a pre-defined template. <i>\$1,500 to \$3,000</i>	Create a full-featured, custom website with enhanced functions such as galleries and videos. <i>\$3,000 to \$5,000</i>

Maintain that critical presence on the Internet so potential customers can find you and respond.

Economy

- Convert copy that describes features of the company — into benefits that customers want.
- Edit copy, headings and navigation links to fit and flow logically throughout the website.
- Optimize images to correct for resolution, distortion, color, contrast and shadows.

Standard

- Specify the content and navigation links for the website and write the copy and headings for all pages.
- Design the homepage and two types of additional page formats including navigation features.
- Adjust, modify and rework images provided by the customer.
- Develop, test and implement the website on the customer's Internet Service Provider platform.

Premium

- Provide all of the services included for economy and standard websites.
- Structure and design a unique website to match business requirements and marketing strategies.
- Produce images or assist the customer in generating photos for use within the website.
- Develop additional features such as galleries, videos, collateral documents and external links.

NOTE: Refer to the "Pricing Summary" on the "Terms" page for more information on a specific premium website.

Don't miss out on all of those people searching the Internet.

Purchase as many services as are appropriate for your business and budget. Be confident that you are getting expert, professional assistance with every aspect of your project. Call to explore your options and to discuss how you can have a dynamic and cost-effective website sooner than you think.
